

**CARAPAX BIVALVE REWATERING PUMP 400**

A diesel powered bivalve rewatering pump developed for the aquaculture sector. The Carapax Bivalve Rewatering Pump 400 supplies up to 400 cubic meters of water per hour enabling maximal rewatering of 30-40 tons of mussels. The pump is powered by a 75 kw diesel turbocharged and after cooled engine. It is equipped with a 316 stainless steel self-primed centrifugal water pump which in turn is connected to the secondary sea water distribution system. Encapsulated in a stainless-steel cover to protect it from the elements. The Carapax BRP400 is controlled by a DSEE module enabling it to run on a time-controlled program with fully automatic start and stop intervals.
