

CARAPAX MUSSEL DECLUMPER 850

The Carapax Mussel Declumper 850 is hydraulically driven with a capacity of up to 25 tons per hour. The machine is developed for blue mussels and designed for both spat separation and consumption size mussels. Fully constructed of stainless steel suitable for the harsh marine environment. Comes with a side feed attachment and interchangeable washing screens with custom specified grid patterns. The declumper comes with a hydraulically adjustable incline and six deck mounting plates. 2" water feed with two adjustable valves for water flow to declumping and washing area.
